N=1000 Margin of Error +/- 3.2 percentage points

101. The Two COVID-19 Vaccines produced by Pfizer and Moderna are the first of their kind – lab created mRNA strands put into vaccines aimed to alter our immune system at the cellular level. Which of the following statements comes closer to your view? Statement A: The mRNA vaccine is new to the field of immunology and will produce positive results for humankind in the near and long-term future. Statement B: The short and long-term effects of mRNA vaccines are largely unknown and could cause irreversible harm for those who receive the vaccine.

102. Regarding the mRNA based COVID-19 vaccine, which of the following statements comes closer to your view? Statement A: The severity of the pandemic requires accelerated production and distribution of a vaccine for COVID-19. The FDA must find ways to rush this to as much of the public as soon as possible. Statement B: While there are claims that the COVID-19 vaccine is safe, the reality is that vaccines take years of testing and still cause serious injuries and even death. This vaccine is not ready.

103. When you think about the mRNA based COVID-19 vaccine which of the following statements comes closer to your view? A. It makes me feel like safety is around the corner and that we can all return to our normal lives soon. B. It makes me feel worried because it is being rushed to distribution and needs a lot more testing.

103. When you think about the mRNA based COVID-19 vaccine which of the following statements comes closer to your view? A. It makes me feel like safety is around the corner and that we can all return to our normal lives soon. B. It makes me feel worried because it is being rushed to distribution and needs a lot more testing.
