 N=1011 Margin of Error +/- 3.1 percentage points

102. In a recent testimony before U.S. Senate, Dr. Anthony Fauci (Director of the National Institute of Allergy and Infectious Diseases, a division of the National Institutes of Health) estimated that -a little over half to 60%- of NIH employees have received the COVID-19 vaccine. Dr. Rochelle Walensky (Director of the Centers for Disease Control) stated about the same percentage of CDC employees received the COVID-19 vaccine. Which of the following viewpoints comes closer to yours? Statement A: The fact that nearly half of NIH and CDC employees have decided not to get the COVID-19 vaccine is infuriating and sends a message that even the experts have concern about the COVID-19 vaccine. This is fraudulent. Statement B: The fact that nearly half of NIH and CDC employees have decided not get the COVID-19 vaccine does not change my opinion about the COVID-19 vaccine. I give them the benefit of the doubt.

103. Agency capture is the belief that a federal regulatory agency has been compromised or captured by the interests of big business (example, the FDA being pushed by the business interests of the Pharmaceutical industry over the public's interest). Which of the following statements comes closer to your view regarding agency capture?  
 Statement A: Agency capture is real and a serious threat to our Democracy. Statement B: Agency capture is overblown and not a serious threat to our Democracy.

103. Agency capture is the belief that a federal regulatory agency has been compromised or captured by the interests of big business (example, the FDA being pushed by the business interests of the Pharmaceutical industry over the public's interest). Which of the following statements comes closer to your view regarding agency capture?  
 Statement A: Agency capture is real and a serious threat to our Democracy. Statement B: Agency capture is overblown and not a serious threat to our Democracy.
