106. Recently federal employees have been mandated to receive the COVID vaccine. Many state-funded educational institutions are requiring staff and students to receive the COVID vaccine in order to return to school, and some private employers are now requiring their employees to get the COVID vaccine. Please read the following statements. Statement A: Government employers (federal, state, and local) as well as private employers are justified in mandating the COVID vaccine to their employees. Statement B: Any employer who wants to mandate the COVID vaccine must offer exemptions and accommodate employees who do not want to take the vaccine. Which comes closer to your view?
